**Advisory Action**

Application No.

09/699,031

Applicant(s)

OBRADOVICH, MICHAEL L

Examiner

Baoquoc N To

Art Unit

2172

**--The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

THE REPLY FILED 23 September 2003 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. Therefore, further action by the applicant is required to avoid abandonment of this application. A proper reply to a final rejection under 37 CFR 1.113 may only be either: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114.

**PERIOD FOR REPLY [check either a) or b)]**

- a) ☒ The period for reply expires 3 months from the mailing date of the final rejection.
- b) ☐ The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection. ONLY CHECK THIS BOX WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. ☐ A Notice of Appeal was filed on \_\_\_\_\_. Appellant's Brief must be filed within the period set forth in 37 CFR 1.192(a), or any extension thereof (37 CFR 1.191(d)), to avoid dismissal of the appeal.
2. ☐ The proposed amendment(s) will not be entered because:
- (a) ☐ they raise new issues that would require further consideration and/or search (see NOTE below);
  - (b) ☐ they raise the issue of new matter (see Note below);
  - (c) ☐ they are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or
  - (d) ☐ they present additional claims without canceling a corresponding number of finally rejected claims.

NOTE: \_\_\_\_\_.

3. ☐ Applicant's reply has overcome the following rejection(s): \_\_\_\_\_.
4. ☐ Newly proposed or amended claim(s) \_\_\_\_\_ would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).
5. ☒ The a) ☐ affidavit, b) ☐ exhibit, or c) ☒ request for reconsideration has been considered but does NOT place the application in condition for allowance because: Please see attachment.
6. ☐ The affidavit or exhibit will NOT be considered because it is not directed SOLELY to issues which were newly raised by the Examiner in the final rejection.
7. ☒ For purposes of Appeal, ~~the proposed amendment(s) a) ☐ will not be entered or b) ☐ will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended.~~

The status of the claim(s) is (or will be) as follows:

Claim(s) allowed: \_\_\_\_\_.

Claim(s) objected to: \_\_\_\_\_.

Claim(s) rejected: 1-7, 11, 13, 14, 16 and 22-25.

Claim(s) withdrawn from consideration: \_\_\_\_\_.

8. ☐ The proposed drawing correction filed on \_\_\_\_\_ is a) ☐ approved or b) ☐ disapproved by the Examiner.
9. ☐ Note the attached Information Disclosure Statement(s) (PTO-1449) Paper No(s). \_\_\_\_\_.
10. ☐ Other: \_\_\_\_\_

The applicant argues that it does not appear that Fultz discloses or suggests "requesting information from an external server ...receiving the information from the external server; and providing the information to remote computer system"

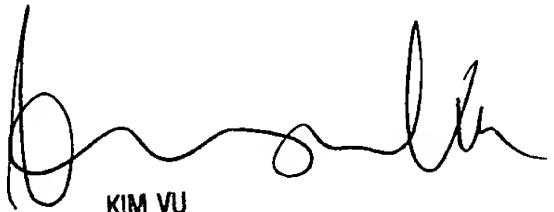

The examiner respectfully disagrees with the above argument because Fultz discloses a system allowing a user from the Mobil computer inquires to a base station as the external server to retrieve the navigation information and other resources (col. 7, lines 65-67 and col. 8, lines 1-5). The computer at the user is the client-server architecture that allow the user to request and transmitted the request to base station. The information is retrieved and transferred back to the Mobil as remote computer system (col. 10, lines 22-58).

The applicant also argues that, "in any event, it would appear that profiles in Herz are individual for each user, and the user's multiple profiles, even if it is assumed that Herz teaches , multiples profiles, does not include a standard profile"

The examiner respectfully disagrees with the above argument because each of the search conducted for target objects whose profiles most closely match the user's interests as described by the user's target profiles interest summary (col. 5, lines 23-26). At the same time Herz also discloses a target profile interest summary for a single user must represent multiple areas of interest, for example, by consisting of a set of individual search profiles" (col. 5, lines 19-23). Clearly, the target profiles in Herz is a set of profiles utilizing for searching for the targets of objects. Since the claim do not differentiate from a standard profile and other profiles. One of the Herz's multiples profile is a standard profile as the applicant claimed.

The applicant argues that, "Herz does not disclose or suggest a copied profile in the context of claim 22".

The examiner respectfully disagrees with the above argument because although the applicant pointed out to the examiner that the specification defining how the copied profile constructed and operated; However, the copied profile was not defined in that way in the context of claim 22. Herz teaches each user is presented with those target objects whose profiles most closely match the user interest as described by the user's target profile interest summary (col. 5, lines 23-26). The user's target summary is the copied of the user's multiple search profiles.
